# WeRec

Ramilya Yusupova (Backend Developer)

Arina Smirnova (Project Manager)

Sergey Zhurbey (Backend Developer, Tester)

Andrey Kan (Frontend Developer)

Mahmoud Hossameldin (Frontend Developer)

#### Project statement

WeRec is a personal video feed creator. Use web client to customize video feed, invite parents, friends, or kids to join WeRec-bot in a messenger (such as Telegram, Whatsapp, etc.) and share created feed with them. This will allow to control the amount and the quality of content User's beloved people watch or to recommend others User's personal video collection.

- First-end users can set up a custom video feed by specifying videos source and via web app connect it to a chatbot for selected messenger
   Second-end users then can access the chat bot and consume verified content
- Users can create a personal account to manage their feeds

Team: Ramilya Yusupova, Arina Smirnova, Sergey Zhurbey, Anrdey Kan, Mahmoud Hossameldin Repository: WeRec-specs This report:
